Return from Armageddon

B0B1WB4C4L B0B1HXV2KS

In this tale of one possible future, the people of Earth have finally united under one flag and have formed a one-world government with the capital situated in what was formerly known as Las Vegas. Although religious and political strife have been squelched under the iron rule of the Federation of United Countries and United Peoples, a new threat looms. An armada of spaceships appears near Jupiter with the apparent intention of invading the troubled planet.

Brilliant engineer Becky Johnson designs a planetary defense system under the direction of General Max Berger, chief military officer of the Federation. The system is nearly ready to be activated when things begin to go awry.

Return From Armageddon is available as paperback or eBook on Amazon, in select bookstores, and at local events in the Spokane and North Idaho area.

Meadowlark Madness

B0B2HZXVQD 1639445978

Emily Trace is a young widow with a mission: to find out who murdered her husband. The police are baffled, and after six months she decides to take matters into her own hands

Opening her own detective agency, E. T. Investigations, seems to Emily like a good way to look for clues. That is, until her first client shows up with the mistaken impression that E. T. stands for Extra-Terrestrial instead of Emily Trace. He hires her to book into an alien abduction involving a species of bird - meadowlark, no less - and before she can say UFO, she is embroiled in a case that will change her life.

Set in the Pacific Northwest city of Spokane, Washington, *Meadowlark Madness* takes the reader on a trek through several of the sleepy farming communities in the area, where Emily encounters some strange happenings and a few unexpected side trips.

Meadowlark Madness is available as paperback or eBook on Amazon, in select bookstores, and at local events in the Spokane and North Idaho area.

Taming of the T-bird

B0B2V4H1FH B0B2TVKRXS

A small-town contractor seeks the help of detective Emily Trace regarding an unusual car problem. She suspects the vehicle's strange behavior has an other-worldly cause, former client Melvin Young has referred the man, and even though her caseload is flourishing, she decides to take the case.

In her quest to tame the errant 1980 Ford Thunderbird, Emily becomes entangled in murder and arson cases and becomes a prime suspect, at least for a while. Then her quirky, lovable receptionist falls under the spell of a less-than-savory boyfriend, and E. T. Investigations flounders.

To top it all off, Spokane's favorite bungling detective encounters an alien megalomaniac and his minions, who have designs to conquer the planet. It's up to Emily, with a lot of help from her friends, to thwart their evil schemes. But can she stop them in time?

Taming of the T-Bird is available as paperback or eBook on Amazon, in select bookstores, and at local events in the Spokane and North Idaho area.

The Gluten Free Gourmand

B00TRBKT9U 150853134X

This little cookbook has within its pages recipes most anyone can prepare at home at a reasonable cost. No exotic flours, just good-tasting food even people without gluten allergies or sensitivities will enjoy.

Send In The Drones

B0B3X7SJ2 BOB3JMF374

Pieces and parts brought in by Emily's latest client come together to form a personal-size drone. As soon as the assembly is complete, it disappears, but not before shooting its laser at E. T. Investigations' latest employee.

It is the beginning of a drone plague, one which wreaks havoc with Emily's employees, threatens the U. S. Postal Service, and is glimpsed by witnesses from Spokane to Slippery Gulch, with a potential visit to an abandoned alien base on the slopes of Tekoa Mountain.

Join Emily Trace and her friends from near and far as she faces off with a control freak and a laser-armed attacker and finally cracks her very first case as she discovers who murdered her husband.

Send in the Drones is available as paperback or eBook on Amazon, in select bookstores, and at local events in the Spokane and North Idaho area.

Short Trips to Alternate Universes

B08P342L5V B08P3QTJQL

A collection of compositions by the author spanning about 30 years in Earth time and who knows how long in the space-time continuum.
